

NTK/KW/15 – 6988

**Fourth Semester Examination for the Degree
of Bachelor of Pharmacy**

PHARMACEUTICAL CHEMISTRY-IV

Heterocyclic and Macromolecules

Paper - 4 T 2

Time : Three Hours]

[Max. Marks : 80

- N. B. : (1) Question No. 1 is Compulsory.
(2) Solve any four questions from the remaining.
(3) Draw neat labeled diagram wherever necessary.

1. Comments on the following (any **five**) :—

- (a) Importance of heterocycles in Pharmaceutical Sciences.
- (b) Interconversion of glucose to fructose.
- (c) Cyclic structure of monosaccharides.
- (d) Synthesis of Alpha amino acids.
- (e) Pschore synthesis of pheanthrene.
- (f) Pyridine is stronger base than pyrrole.
- (g) Saponification value of fats. 5x4=20

2. Give preparation, properties and uses of the following:

- (i) Imidazole. (ii) Pyridine.
- (iii) Furan. 15

NTK/KW/15–6988

Contd.

3. Discuss synthesis, properties and biological importance of Quinoline and purine. 15
4. (a) Give synthesis and important properties of Naphthalene. 8
(b) Discuss various characteristics values used to identify and detect adulteration in fixed oils and fats. 7
5. (a) Discuss structural elucidation of sucrose as disaccharide. 8
(b) Explain oxidative reactions in monosaccharide. 7
6. (a) Define and classify amino acids with suitable structures. 8
(b) Discuss various methods for synthesis of polypeptides. 7
7. (a) Write short notes on (any **three**) :—
(i) Mutarotation.
(ii) Epimerization.
(iii) Phospholipids.
(iv) Glycosides. 3x5=15
